

## ReCAMA

# Regional Sub-directory of Harvesting and Post-Harvesting Machinery and Equipment Manufacturers

November 2024

**Disclaimer:** The information in this sub-directory does not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries. Where the designation “country or area” appears, it covers countries, territories, cities or areas. Bibliographical and other references have, wherever possible, been verified. The United Nations bears no responsibility for the availability or functioning of URLs. The opinions, figures and estimates set forth in this sub-directory should not necessarily be considered as reflecting the views or carrying the endorsement of the United Nations. The mention of firm names and commercial products does not imply the endorsement of the United Nations.

**Preface:** The Regional Council of Agricultural Machinery Associations (ReCAMA) was established by the Centre for Sustainable Agricultural Mechanization (CSAM) of the United Nations Economic and Social Commission for Asia and the Pacific (ESCAP) in 2014. ReCAMA aims to promote sustainable agricultural mechanization in Asia and the Pacific through strengthening the capacity of national agricultural machinery associations, facilitating the exchange of knowledge and information, and enhancing collaboration and closer business connections among national associations and their members. ReCAMA is an initiative for scaling-up the availability, adoption and sustainable use of agricultural machinery at the regional level through a demand-driven model closely involving the private sector.

To facilitate information sharing and regional trade among the members, a *ReCAMA Regional Directory of Agricultural Machinery Manufacturers and Distributors* was compiled and published in 2021, and a *ReCAMA Regional Sub-Directory of Conservation Agriculture and Straw Management Machinery and Equipment Manufacturers* in 2022. This *ReCAMA Regional Sub-directory of Harvesting and Post-Harvesting Machinery and Equipment Manufacturers* was developed in response to the 2023 ReCAMA Member Meeting's recognition of the crucial role that harvesting and post-harvesting mechanization play in reducing food losses and strengthening food security.

This Regional Sub-directory is a compilation of information collected by the China Agricultural Machinery Distribution Association (CAMDA); the India Agricultural Machinery Manufacturers' Association (AMMA-India); and the Turkish Association of Agricultural Machinery & Equipment Manufacturers (TARMAKBIR).

The team at CSAM working on the consolidation of the information included Yuee Feng, Xiaochen Zhang, Zishuai Yu, and Yidan Xu. Special thanks go to Zishuai Yu for his work on the layout and design.
